Hands On Sessions – March 15th

Start	End	Room A	Room B
09:00	10:00	IBM DevOps Hands-On Lab In this hands-on session you will play the role of a Mainframe Developer that needs to fix a RESTful API that is not working properly. You will use IBM Debugger in order to find out what is wrong. You will create a new Git branch and make the code change in Wazi Developer, a Cloud-Native IDE. You will run a Jenkins pipeline with Integration Tests and merge your change to the master branch to see that the REST API is now working properly. Don't forget to bring your laptop!	
10:00	12:00	BROADCOM Hands-on Lab: Develop COBOL Apps Using VS Code in a Cloud Join this workshop to get hands-on experience with developing on Mainframe using VS Code in an ondemand cloud dev environment. By simply using a browser on your laptop you will be able to access modern VS Code developer tools to perform all your daily activities, such as editing code, compiling, debugging, testing, and more without a need to access ISPF or install software on your machine. Sign up today using gse-germany.pdl@broadcom.com . Don't forget to bring your laptop!	

DB2 Guide

Donnerstag, 14. März 2024			
Start	Ende	Zeit	Raum (offen)
12:30	13:30	01:00	Mittagessen
13:30	13:40	00:10	Begrüßung zum 1. Tag (Chair, Vizechair, IBM)
